Forum on specification & Design Languages

Summer School and Ph.D. Student Forum

Summer School on Specification and Design Languages – Stockholm, 2 - 6 September 2024

The second edition of the Summer School on Design and Specification Languages is targeted at students, researchers and R&D experts from academia and industry, who want to learn about languages, tools and techniques for developing software and hardware systems. The school will cover a diverse array of essential topics encompassing **modeling**, **specification**, and **verification** for a wide spectrum of systems, including **cyber-physical systems**, **distributed systems**, **embedded systems**, **real-time systems**, and the **Internet-of-Things**.

The school will be co-located with the Forum on specification and Design Languages 2024. Over the course of five days, participants can expect a dynamic program featuring lectures, demonstrations, hands-on tutorial sessions, and insightful discussions.

The school program will span over five days: the first two days will be dedicated solely to the school activities, featuring full-length lectures from leading experts in the field, talks given by experts from academia and industry, and discussion sessions where the students may discuss their research with peers and senior researchers. In the last three days, the school program will overlap with the main conference program. Participants will have the opportunity to attend talks and presentations showcasing the latest advancements in modeling and specification languages for system design, directly engaging with the main innovators in the field.

Ph.D. Student Forum

The Ph.D. Student Forum at FDL 2024 will be a poster session giving Ph.D. students the opportunity to present their ongoing research to various experts from industry and academia operating in languages, tools, and techniques for hardware and software system development. During the poster session, senior faculties and researchers from the industry will provide the selected student with valuable feedback about their ongoing research. The forum can also help students and recently graduated postdocs to establish research contacts or to enter the job market.

Application to the Ph.D. Student Forum is open to students at any stage of their doctoral studies and researchers (e.g., postdocs) who recently completed their Ph.D.

General Information

Important Dates

School - Registration closes: **June 16, 2024**
　Notification of acceptance: June 24, 2024
Forum - Submission deadline: **June 16, 2024**
　Notification of acceptance: July 7, 2024

General Chair:
David Broman | KTH
Program Chair:
Klaus Schneider | RPTU Kaiserslautern
Ph.D. Forum and Summer School Chair:
Michele Lora | University of Verona
